

PRESSGLASS

LEADING IN EUROPE

QUALITY AND ENVIRONMENTAL POLICY

Our primary objective is to develop a modern global company to contribute to improved competitive advantage of our Business Partners by catering for their needs and requirements.

Implementing our Quality and Environmental Policy we pursue the objective by providing our Customers with a satisfactory quality level of our products that meet the applicable legal, technological, and environmental requirements; we manufacture our products applying the PRESS GLASS Integrated Management System mitigating pollution to the environment and compliant with ISO 9001 and ISO 14001.

PRESS GLASS is committed to applying best practices throughout the organization following the highest standards enabling the development of a company strategy based on the principles of sustainability, environmental and social issues, and corporate governance.

The Company's Management Board declares regular activities compliant with the Quality and Environmental Policy, improvement of the PRESS GLASS Integrated Management System, optimisation of production costs and waste management and providing funds for the functioning of the system.

Periodic assessment of our implementation of the Quality and Environmental Policy is performed on the basis of production volumes, new product quantity, Customers' satisfaction level and compliance with legal requirements relating to the environment and accomplishment of the approved environmental objectives.

All our staff members are responsible for product quality, Customer service quality and impact on the natural environment.
